

FONTANA ARTE ATTR. FLOATING PICTURE FRAME

Description

An exceptional hanging picture frame comprising 2 glass plates with beveled edges floating within a solid, heavy-gauge brass frame, all with radiused corners. So striking that it nearly functions as wall art without the addition of an actual photograph. Unsurpassed quality with perfect patina. This is the first example of this particular design we've encountered. Italian, strongly attributed to Fontana Arte, 1950s.
